

# Onboarding Maturity Assessment Overview

## Assess Your Current State, Envision Your Future

This assessment gives you an overview of where your current onboarding process stands today across four key dimensions: Design Philosophy, Core Content, Delivery Approach and Program Governance. It's a great way to understand where your onboarding program already excels and where there are opportunities to grow or evolve your program. Using this approach began in the book, *Successful Onboarding*. SilkRoad continues to combine our tens of thousands of hours of experience consulting with customers around their onboarding processes, challenges and solutions.

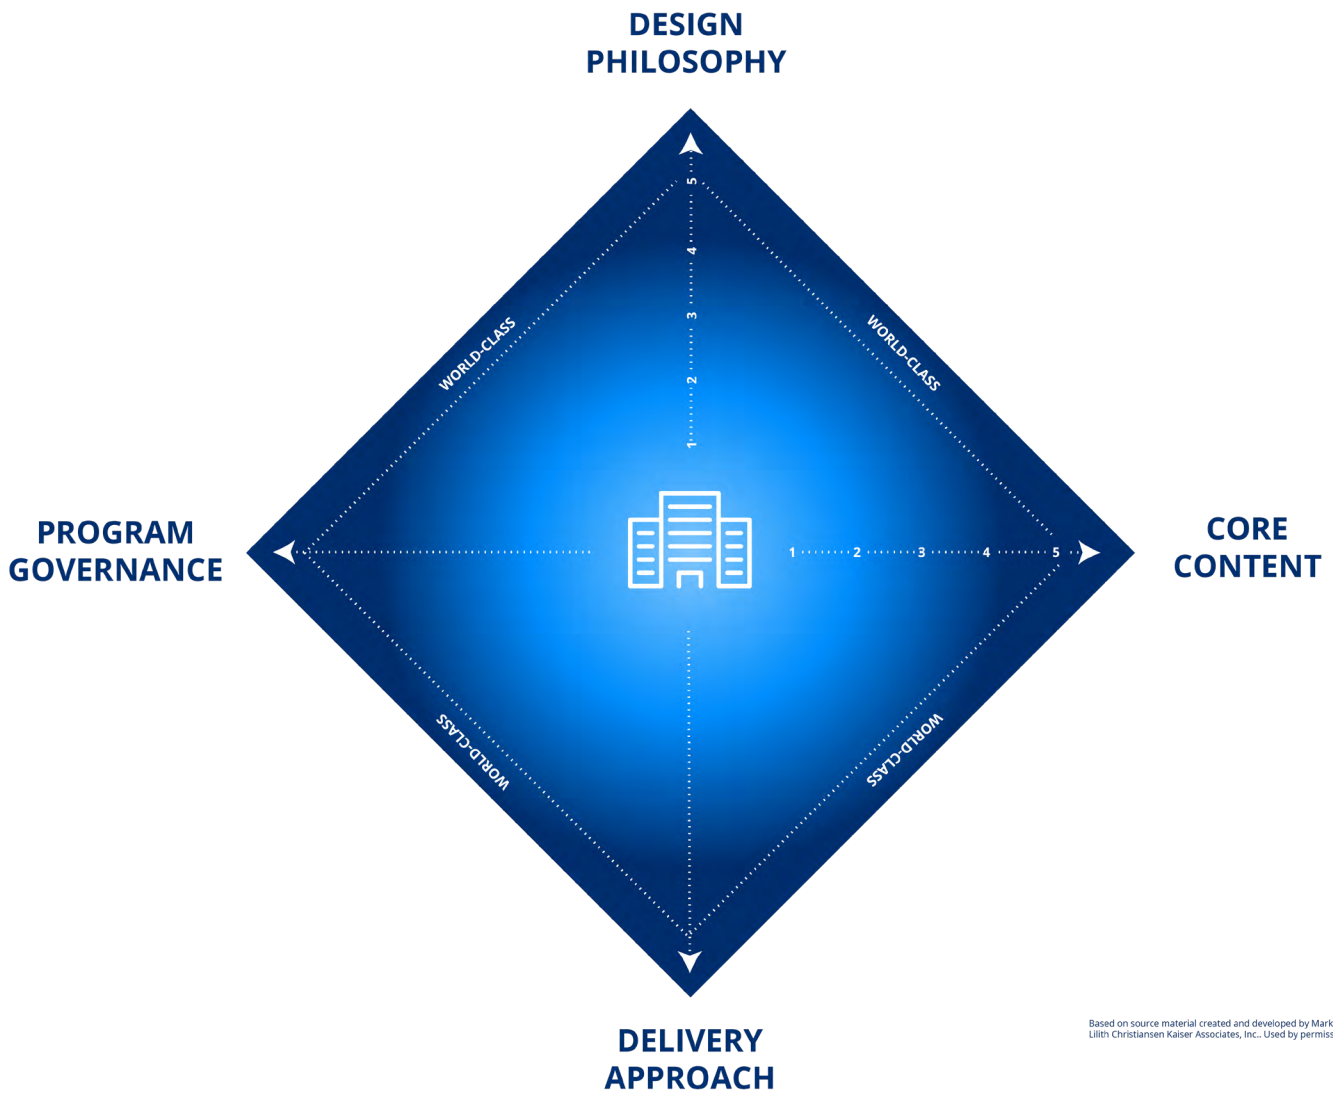

The [Onboarding Maturity Assessment](#) is based on the common characteristics and challenges organizations experience at key stages along what we call the Onboarding Margin Maturity Curve. While most organizations fall somewhere short of world-class onboarding practices today, the Onboarding Maturity Assessment uncovers insight into key opportunity areas around the right design and enabling infrastructure that will help your onboarding program evolve and progress to the next level – or several levels – of maturity.

## How to Get Started

So let's get started. The Onboarding Maturity Assessment starts with a questionnaire. It takes about 30 minutes to complete. Once we receive your answers, we analyze the maturity of your onboarding program across the four key dimensions: Design Philosophy, Core Content, Delivery Approach, and Program Governance. Your assessment report includes some insights and perspectives on where your organization aligns on each dimension as well as overall onboarding program maturity. Your detailed report will include areas of strength and areas of opportunity for improvement.
